

## **Search Tips**

You can search by Tool Number or Tool Name in the Keyword Search box. This site searches through multiple data fields so we can return the widest search results possible. We try to have the most relevant items appear at the top of your list, based on searching the fields below, in the order shown.

1. Product ID (Tool Number)
2. Tool Name
3. Description
4. Kit/ Component relationship

To search by tool number, simply type the complete or partial tool number in the box, and click 'Go'. Be sure to properly enter symbols (-, /, etc.). If you are unsure where they should be placed, then use partial numbers to ensure the widest search results.

To search by tool name, simply type the complete or partial tool name in the box, and click 'Go'. If you are unsure of the spelling, then use partial words to ensure the widest search results.
