pedals

SPECIFICATIONS

Operating Range
20" - 37" Tires

Maximum Stack Height
61.5" Total Height

FEATURES

- Hands Free, Foot Operated Opening
- Durable Steel Construction for Long Life
- Larger Slotted Pedals for Sure Grip
- Hydraulic Spring actuated Auto-Closing Arms
- Holds Tire Stack Securely

THE ORIGINAL TIRE CART!

No one is able to match the strength, durability and versatility of our TC400. Laser cut frame components create a rigid frame to prevent twisting in the handles and steel construction means it's built to last. A foot operated opening and auto-closing tire cradle makes it easy to use and the hydraulic spring maintains a constant clamping pressure on the tire stack, so tires stay on the cart! The TC400 has the largest cradle operating range on the market, handling everything from 20" to 37" tires. The airless no-flat tires run on precision bearings and provide the feel of a pneumatic tire with the durability of a solid tire. Made in the U.S.A. at Branick's manufacturing facility in Fargo, ND!
