Your safety - our mission

Meet Unique Repair Requirements

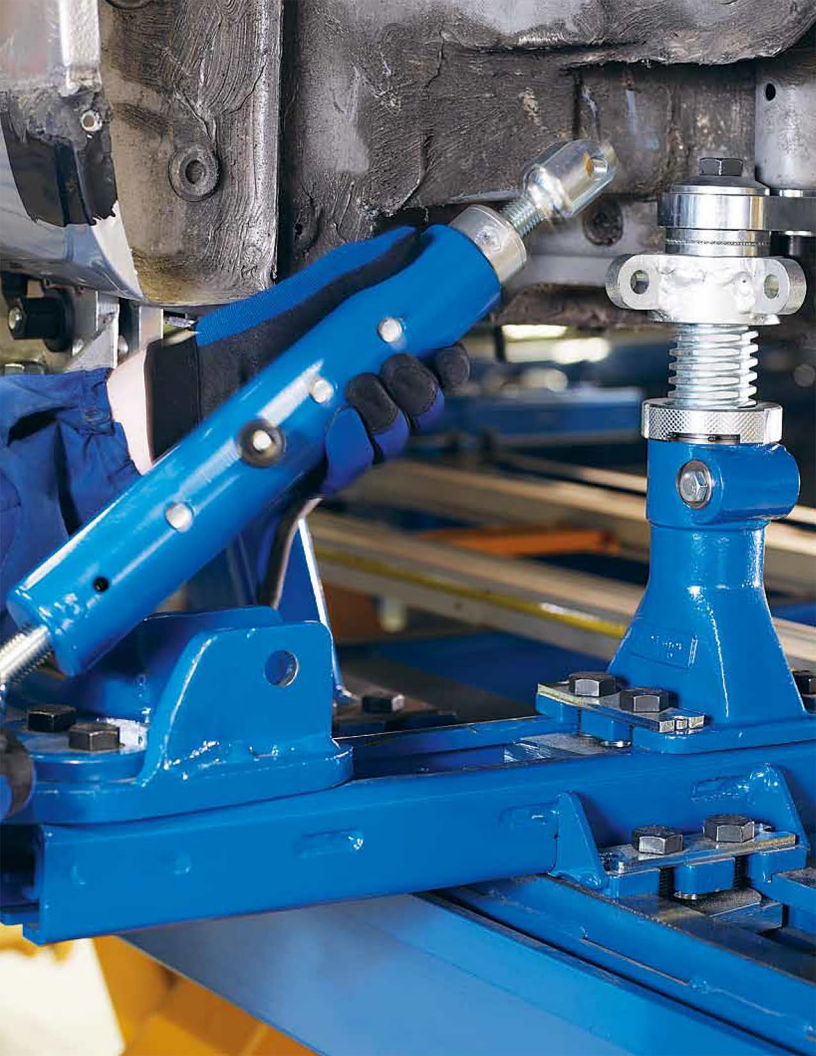

EVO is a universal anchoring, holding and fixturing system that contains a minimum number of components.

With three configurations, the modular EVO system is readily adaptable to be assembled in a multitude of configurations to address your repair needs. These universal kits that work for every vehicle year, make and model so you never have to pay fixture costs.

Features and Benefits

- Universal - fits any car, van, SUV or light truck on the road, no need to rent or buy extra fixtures
- Modular - limited components that, when combined, meet your repair needs
- Fast - quick and easy set-up saves time and money
- Vice-like clamps for no slips
- Isolate pulling force by holding adjacent areas
- Upgradeable - start with EVO 1 and add EVO 2, EVO 3 or other offered combinations
- Compatible with the Car-O-Tronic™ Vision X3 Measuring System and WorkShop Solution equipment management system
- Meets several OEM-approved equipment standards

Designed for Modern Modularity

Each EVO system – 1, 2 and 3 – is made up of an optimal number of components and can be used alone or combined with one another to handle every anchoring, holding and fixturing situation so you can repair each vehicle that enters your shop. There may be a minimum number of components, but together they provide maximum benefit. That's what we mean by modern modularity.

EVO 1 Basic Anchoring

The basic system for anchoring, holding and side support during the repair. The kit includes three towers, multi-purpose clamp, track plate, adapter with bushings, chain holder, downpull and torque bar for heavy operations.

Start with EVO 1 and add on to it as needed.

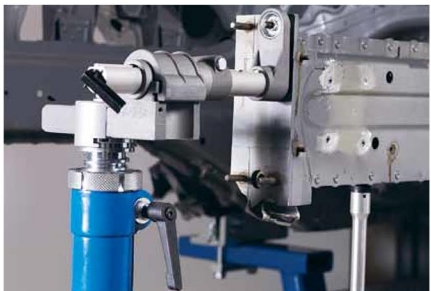

EVO 2 Extended Anchoring

This additional kit for EVO 1 Basic Anchoring provides additional equipment for anchoring, holding and side support during the repair. EVO 2 includes two extra towers and track plates, special tools for rear axle bracket, torque bar extensions and adjustable holders, it is the perfect addition to EVO 1 allowing you to more easily tackle advanced repairs.

EVO 3 Holding and Fixturing

EVO 3 is made for building a fixture to hold new body parts in place when welding and bonding. When combined with EVO 1 and 2, and supported by the Car-O-Tronic Vision X3 electronic measuring system, the equipment works on all vehicle models on the market. Available parts include: adjustable fixture heads, lockable universal joints, lock handle, all-purpose mini-clamp for frame rails, inner fenders and strut towers.

Maximize the Benefits of EVO!

Hold On To More Business

Support the entire vehicle repair process when you integrate EVO with other Car-O-Liner product solutions.

EVO is compatible with Car-O-Liner benches BenchRack, Quick 42 and Mark 6 and has been approved and recommended by major Original Equipment Manufacturers.

The Car-O-Tronic™ Vision X3 electronic measuring system not only measures, but also guides you through the entire fixturing process.

Step 1: Enter the car's VIN code to access measuring and holding data for the vehicle under repair.

Step 2: Measure the vehicle

Step 3: Fixture the vehicle following the displayed holding variations recommended as suitable for the alignment procedure.

Speed up your workflow. By integrating EVO into the WorkShop Solution wall, you can quickly locate parts thereby increasing efficiency.

With Car-O-Liner benches, measuring equipment and WorkShop Solutions you'll have the best solution for rapid results and premium quality from diagnosis and repair to final check and documentation.

Car-O-Liner's WorkShop Solutions make it easy for you to store and see all your EVO Components

Your Total Solutions Provider

... Complete Systems and Support

Invest in long-term success with the innovative technology and tools you need!

Car-O-Liner's total solutions provide you with:

- The right product for every repair
- Comprehensive OEM approvals
- Reliable technology to increase productivity, satisfaction, workflow and revenue

Platforms that increase productivity

Highly efficient welding systems

Assured quality control with Car-O-Tronic Measuring Systems

WorkShop Solutions that facilitate lean production

EVO System for holding, anchoring and fixturing offers low operating costs

Knowledge is power, supplied by the Academy training programs

24 hour access to vehicle information

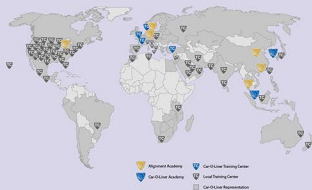

Customer Service worldwide
