

CL Challenger Lifts

Why Versymmetric® 2-Post?

- » It's like owning 2 lifts in One — Versymmetric® 2-Post lifts provide the versatility to lift symmetrically and asymmetrically within the same service bay.
- » Models come in several arm configuration packages for maximum productivity.
- » Maximizes service capabilities and revenue potential.
- » Provides open door clearance for trucks, vans, SUV's and passenger cars for access to vehicle controls.
- » Space saving base plate provides obstruction free work environment.
- » Dual safety locks disengage simultaneously with a Single Point Mechanical Lock Release.
- » Overhead shut off system protects vehicles from being raised too high.
- » The most versatile lift in the industry can be turned into a complete bay productivity solution with many accessories to choose from such as an air/electric workstation, stack extension pad adapters and organizer kit.

Versymmetric® 2-Post models available in 10,000 lb. capacity.

Heavy Duty Symmetric 2-Posts available in 12,000 / 15,000 / 18,000 lb. capacities.

Many accessories to choose from.

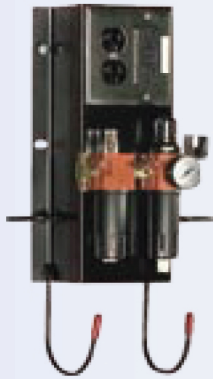

Versymmetric® 2-Post Accessories

Column Extensions

Column extensions provide more working space underneath the lift. This allows the technician to work at their ergonomic height while servicing larger vehicles.

- » Column extensions allow technician to service high profile vehicles
- » 2' and 3' extensions available for CL10 and CL10V3

Air/Electric Workstation

Increase productivity with air supply and electric outlets on the lift column.

- » Convenient power source for extension lights and other tools
- » Air supply will always be at arms reach for facilities using impact wrenches

Dual Pendant Controls

Dual Pendant Controls provide access to lift controls while spotting a vehicle. Handheld controls are tethered to both columns for convenient lifting control from both sides. Each control is backed with a magnet enabling the pendant to be located on the column anywhere above 18 1/2". Simple up and down controls activate the raising and lowering functions of the power unit.

Features:

- » Provides ability to raise and lower the lift while spotting
- » Handheld controls tethered to both columns activate the raising and lowering functions of the power unit
- » Magnet backed pendants can be located anywhere on the column above 18 1/2"

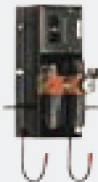

part numbers:

Part#: 10313

Part#: 10315

Part#: B10264

Part#: DPC

Part Number	Description
10313	Two 6" Stack Adapters
10315	Stack Adapter Kit - includes: four 3" Stack Adapters, two 6" Stack Adapters, and two Organizer Racks with mounting hardware
10316	Adapter Organizer Rack
B99700	Tire tool manager work station filter/lubricator/regulator
B10264	Air/electric workstation with filter/lubricator/regulator
DPC	Dual Pendant Controls
