DYNAMIC CONDUCTANCE BATTERY TESTING TECHNOLOGY

- Combines direct temperature measurement with deep scan technology to improve accuracy and decisiveness
- Advanced preventative maintenance algorithms identify batteries approaching end-of-life

SUPERIOR USER INTERFACE

- Large graphical screen features icons and improved explanations
- Scroll bar capability reduces number of screens
- Hot keys improve logic and flow
- Printer enhances and reinforces the selling/service process

ADDITIONAL FEATURES

- Replaceable cables for easy repair
- AGM battery test algorithm
- Live voltmeter for alternator output verification

BENEFITS

Battery diagnostic solution that helps generate battery sales and improve customer satisfaction:

- Test more batteries; sell more batteries
- Fast, safe, and simple to use
- Battery state of health information can be printed for customer review
- Dealer-customizable coupon helps sell other products & services
- Internal counters to monitor testing compliance
