

GRX-3590 Kit

Battery Diagnostic Station

The **GRX-3590 KIT Battery Diagnostic Station** is a new battery diagnostic and charging solution to improve customer satisfaction, increase dealer profits, and streamline your battery warranty process.

Fast, accurate, and reliable. The GRX can perform a complete battery diagnostic session, often in less than five minutes, to determine if a battery is recoverable. Defective batteries are rapidly identified, and recoverable batteries are quickly and safely charged, putting your customers back on the road faster.

GRX-3590 KIT

BENEFITS

Battery diagnostic charging solution that helps complete warranty repairs quickly and reduce costs associated with defective or poorly maintained batteries:

- Faster time to decision
- Generates ACES and DTC codes for battery warranty claims
- Improves customer satisfaction
- Reinforces brand loyalty by improving battery state of health

DIAGNOSTIC CHARGE MODE

- Quickly and efficiently assesses the condition of the battery and only charges the good ones

POWER SUPPLY MODE

- Maintains the battery's state of charge during vehicle PCM/ECM programming and extensive service work

WARRANTY PROCESS

- Automatically diagnose and charge the battery and generate a Ford ACES Warranty Test Code if necessary

FUTURE WiFi

- For wireless data transfer
