

Air-Assisted 2,000 lb. Capacity High-Lift Transmission Jack...for Trucks and Buses

- For shops with in-ground or above-the-floor vehicle hoists. Covered by OTC Lifetime Marathon Warranty®.
- Low height of 41-1/2" allows transmission to be rolled out from under bus or other vehicle's frame; a clearance problem with competitors' jacks.
- Metered, foot-operated air pump allows effortless lifting of the transmission into place, controlling the load precisely during removal and installation.
- Operation is twice as fast as competitive jacks powered by a hand pump, and it costs less!
- A dedicated adapter that fits the popular Allison 500 and 600 series automatic transmissions is included with No. 5078. (Adapter is also available separately as No. 314729.)
- Safety bypass prevents damage caused by a system overload.

No. 5078 – High-lift transmission jack with air-assist. Wt., 254 lbs.

Model	Max. Load Capacity	Overall Height (low pos.)	Max. Height	Max. Forward Tilt	Max. Backward Tilt	Max. Side Tilt (either side)	Leg Width
5078	2,000 lbs.	41-1/2"	65"	50°	38°	14°	46"
