Now flexible to 90 degrees!

218-WVA-108 Inflatable Bladder Plug with Through-Hole

Item supplied by Worldwide Vapor

- **Flexible** to seal straight or curved passages!
- **Reliable, fast, and efficient...** Seal and Test with ease.
- **Works** with any smoke machine or similar leak detection device.
- **Equipped** with a through hole to apply Diagnostic Smoke[®] vapor for leak detection.
- **One-year** guarantee*

- **Expands** to seal large openings – up to six inches / 152mm

- **Ideal** for sealing any large and/or irregular shaped opening such as those now common to induction systems and exhaust systems.

- **Flexible to 90 degrees**
- **Seal straight or curved passages!**

- *Inflatable Bladder is made of EPDM – not neoprene*
 - Provides advanced protection against the harmful effects of UV and Ozone
 - Resists breakdown and cracking
 - EPDM withstands 27% higher temperatures than neoprene
 - Good up to 375° F / 190° C

- *Inflatable Bladder is Molded – not extruded*
 - Molded bladder provides even wall thickness.
 - Even wall thickness reduces premature bladder failure due to 'blow-out'.
 - Engineered for better control and repeatable equal expansion.

- **AND IT IS SERVICEABLE –**
 - If necessary to replace the bladder, replace the bladder, not the tool!
 - Even more value; the 218-WVA-108 comes **with** a spare inflatable bladder (part number 218-WVA-109) included at no extra charge!

* The bladder tool, excluding the replaceable bladder tube, is guaranteed for one-year.
