SOFTWARE UPDATE PROCEDURE
This instruction manual describes the process to successfully update your battery tester.

Read the instruction carefully and follow the steps listed.

| Note:	The location of the Icons shown on the screen pictures in this procedure may be different from the real location in your battery tester due to different versions.

⚠️ **Device should be connected to a battery using clamps during the process.**
When there is no battery connected during the second half of th update, the device may have to be rebooted at a service location.

Visual	Step-to-step procedure
	To start the over-the-air update process you'll have to be **connected to a stable Wi-Fi network**. **How to check?** You can see if you are connected to wifi by checking if a wifi icon is visible in the main menu.
	Go to **Messages** in the Main Menu and **select the message** that says an update is available.
Welcome...please wait	The update will automatically start loading. **Warning** Make sure the device is connected to a battery, so the device won't run out of charge during the update process.
Connecting to network . Please wait. . . Cancel	The device is connecting to the network that was last used. **Issue?** **If there is an issue with connecting to a network, see the following steps.** **No issue?** If the device can make a connection to a Wi-Fi network without problem, the update will be performed automatically. This will take between **15-30 minutes,** depending on the Wi-Fi connection.

MIDTRONICS Advancing Battery Management

CPX-900 SERIES

Visual	Step-to-step procedure
Scanning for networks. Please wait. . . [Cancel]	If the device cannot directly connect to a Wi-Fi network, it will start scanning for available networks.
WiFi Setup WIFINETWORK 1 WIFINETWORK 2 WIFINETWORK 3 WIFINETWORK 4	Select the **network** you wish to connect to.
Password [keyboard] ESC ?123 . Save	If the network is password protected, you'll be requested to enter the **Password**, and click '**Save**' at the right bottom corner of the screen.
Connecting to network . Please wait. . . [Cancel]	The device is connecting to the network that you have just selected. **Issue?** In the case you are still unable to connect to a network, you may retry once more. If still failing, please contact your nearest **service partner** for assistance. **No issue?** If the device can make a connection to a Wi-Fi network without problem, the update will be performed automatically. This will take between **15-30 minutes,** depending on the Wi-Fi connection.
Performing update using WiFi	The device is updating. Please do **not** move the device, or disconnect from the battery, during the update process.
MIDTRONICS	After the update is installed, the device will reboot. The device is ready to be used again. **Issue?** If you are having issues during or after the update process, please contact your nearest service partner for assistance.
