

The Sync cable kit contains an USB male to USB male cable plus a USB Mini to USB female adapter:

For Sync gen 1, you do not need the adapter, the cable is sufficient. The adapter is provided for future Sync gen 2 modules:

E149107

1. Make Sure the VCM is connected (#2 in photo)
2. Connect one end of the USB Male-A to Male-A (#1 in photo) to the USB port on the diagnostic tester.
3. Connect the other end of the USB Male-A to Male-A (#1 in photo) to the USB port on the vehicle.

OK
